

Two targeting decisions, validated against 2024 meter data (Leeds, UK)

1 City: which neighbourhoods?

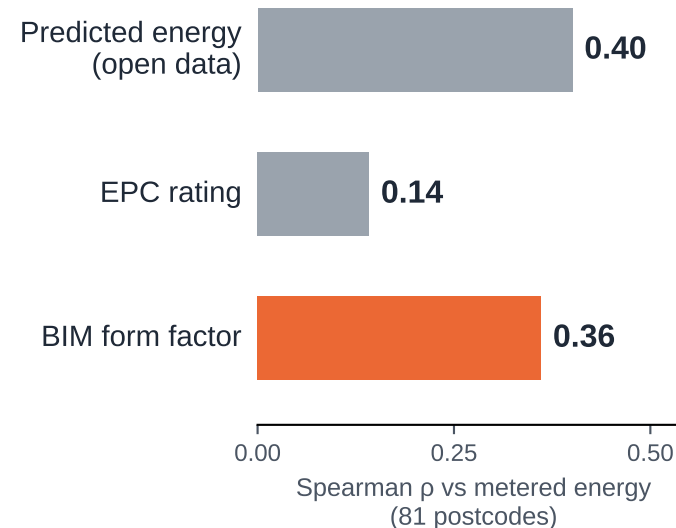

488 neighbourhoods · open data vs meters:
 $\rho = 0.91$ (equal weights) · MAPE 6.2%

2 District: which buildings?

Open-data LOD1 BIM: 2,711 buildings, IFC
INSPIRE parcels + OS outlines + EA LiDAR

3 What decides within the district?

**Open data choose the neighbourhood;
building geometry chooses the buildings.**
